LIST OF CURRENT CLAIMS

1. (Currently Amended) Film for packaging liquid products, comprising a first polyolefin layer, a jointing layer and a layer of polychlorotrifluoroethylene (PCTFE), wherein the PCTFE layer has a thickness of at least 10 micrometer (µm) and the film being ~~comprises an~~ extrusion laminated ~~lamination~~.

2. (Currently Amended) Film according to claim 1, wherein ~~the film comprises a co-extrusion lamination of~~ the polyolefin layer and the jointing layer are co-extrusion laminated with the PCTFE layer.

3. (Previously Presented) Film according to claim 1, wherein the PCTFE layer is made of a homopolymer PCTFE.

4. (Previously Presented) Film according to claim 1, wherein the PCTFE layer has a thickness of at least 20 µm.

5. (Previously Presented) Film according to claim 1, wherein the joining layer is formed of a co-polymer of a polyolefin and glycidyl methacrylate.

6. (Previously Presented) Film according to claim 5, wherein the jointing layer is formed of a co-polymer of ethylene and glycidyl methacrylate (EGMA).

7. (Previously Presented) Method for manufacturing a film according to claim 1, comprising extruding a jointing layer; compressing between a first roller and a second roller the jointing layer and the foil of PCTFE, together with a polyolefin layer so that the PCTFE foil is thus laminated to the jointing layer.

8. (Previously Presented) Method according to claim 7, wherein the jointing layer, together with a layer of polyolefin, is extruded onto said first roller in order to form a two-layered roil.

9. (Previously Presented) Method according to claim 7, including extruding the jointing layer between the rollers, and guiding a polyolefin foil over the first roller and guiding a PCTFE foil over the second roller.

10. (Previously Presented) Method according to claim 7, including providing at least the first roller with a heat regulation.

11. (Previously Presented) Method according to claim 7, including coating the second roller with rubber.

12. (Previously Presented) Method according to claim 7, including providing the second roller with a heat regulator.
